bien remplir  
l'espace entre les bords  
des briques et le cadre  
métallique avec du mortier

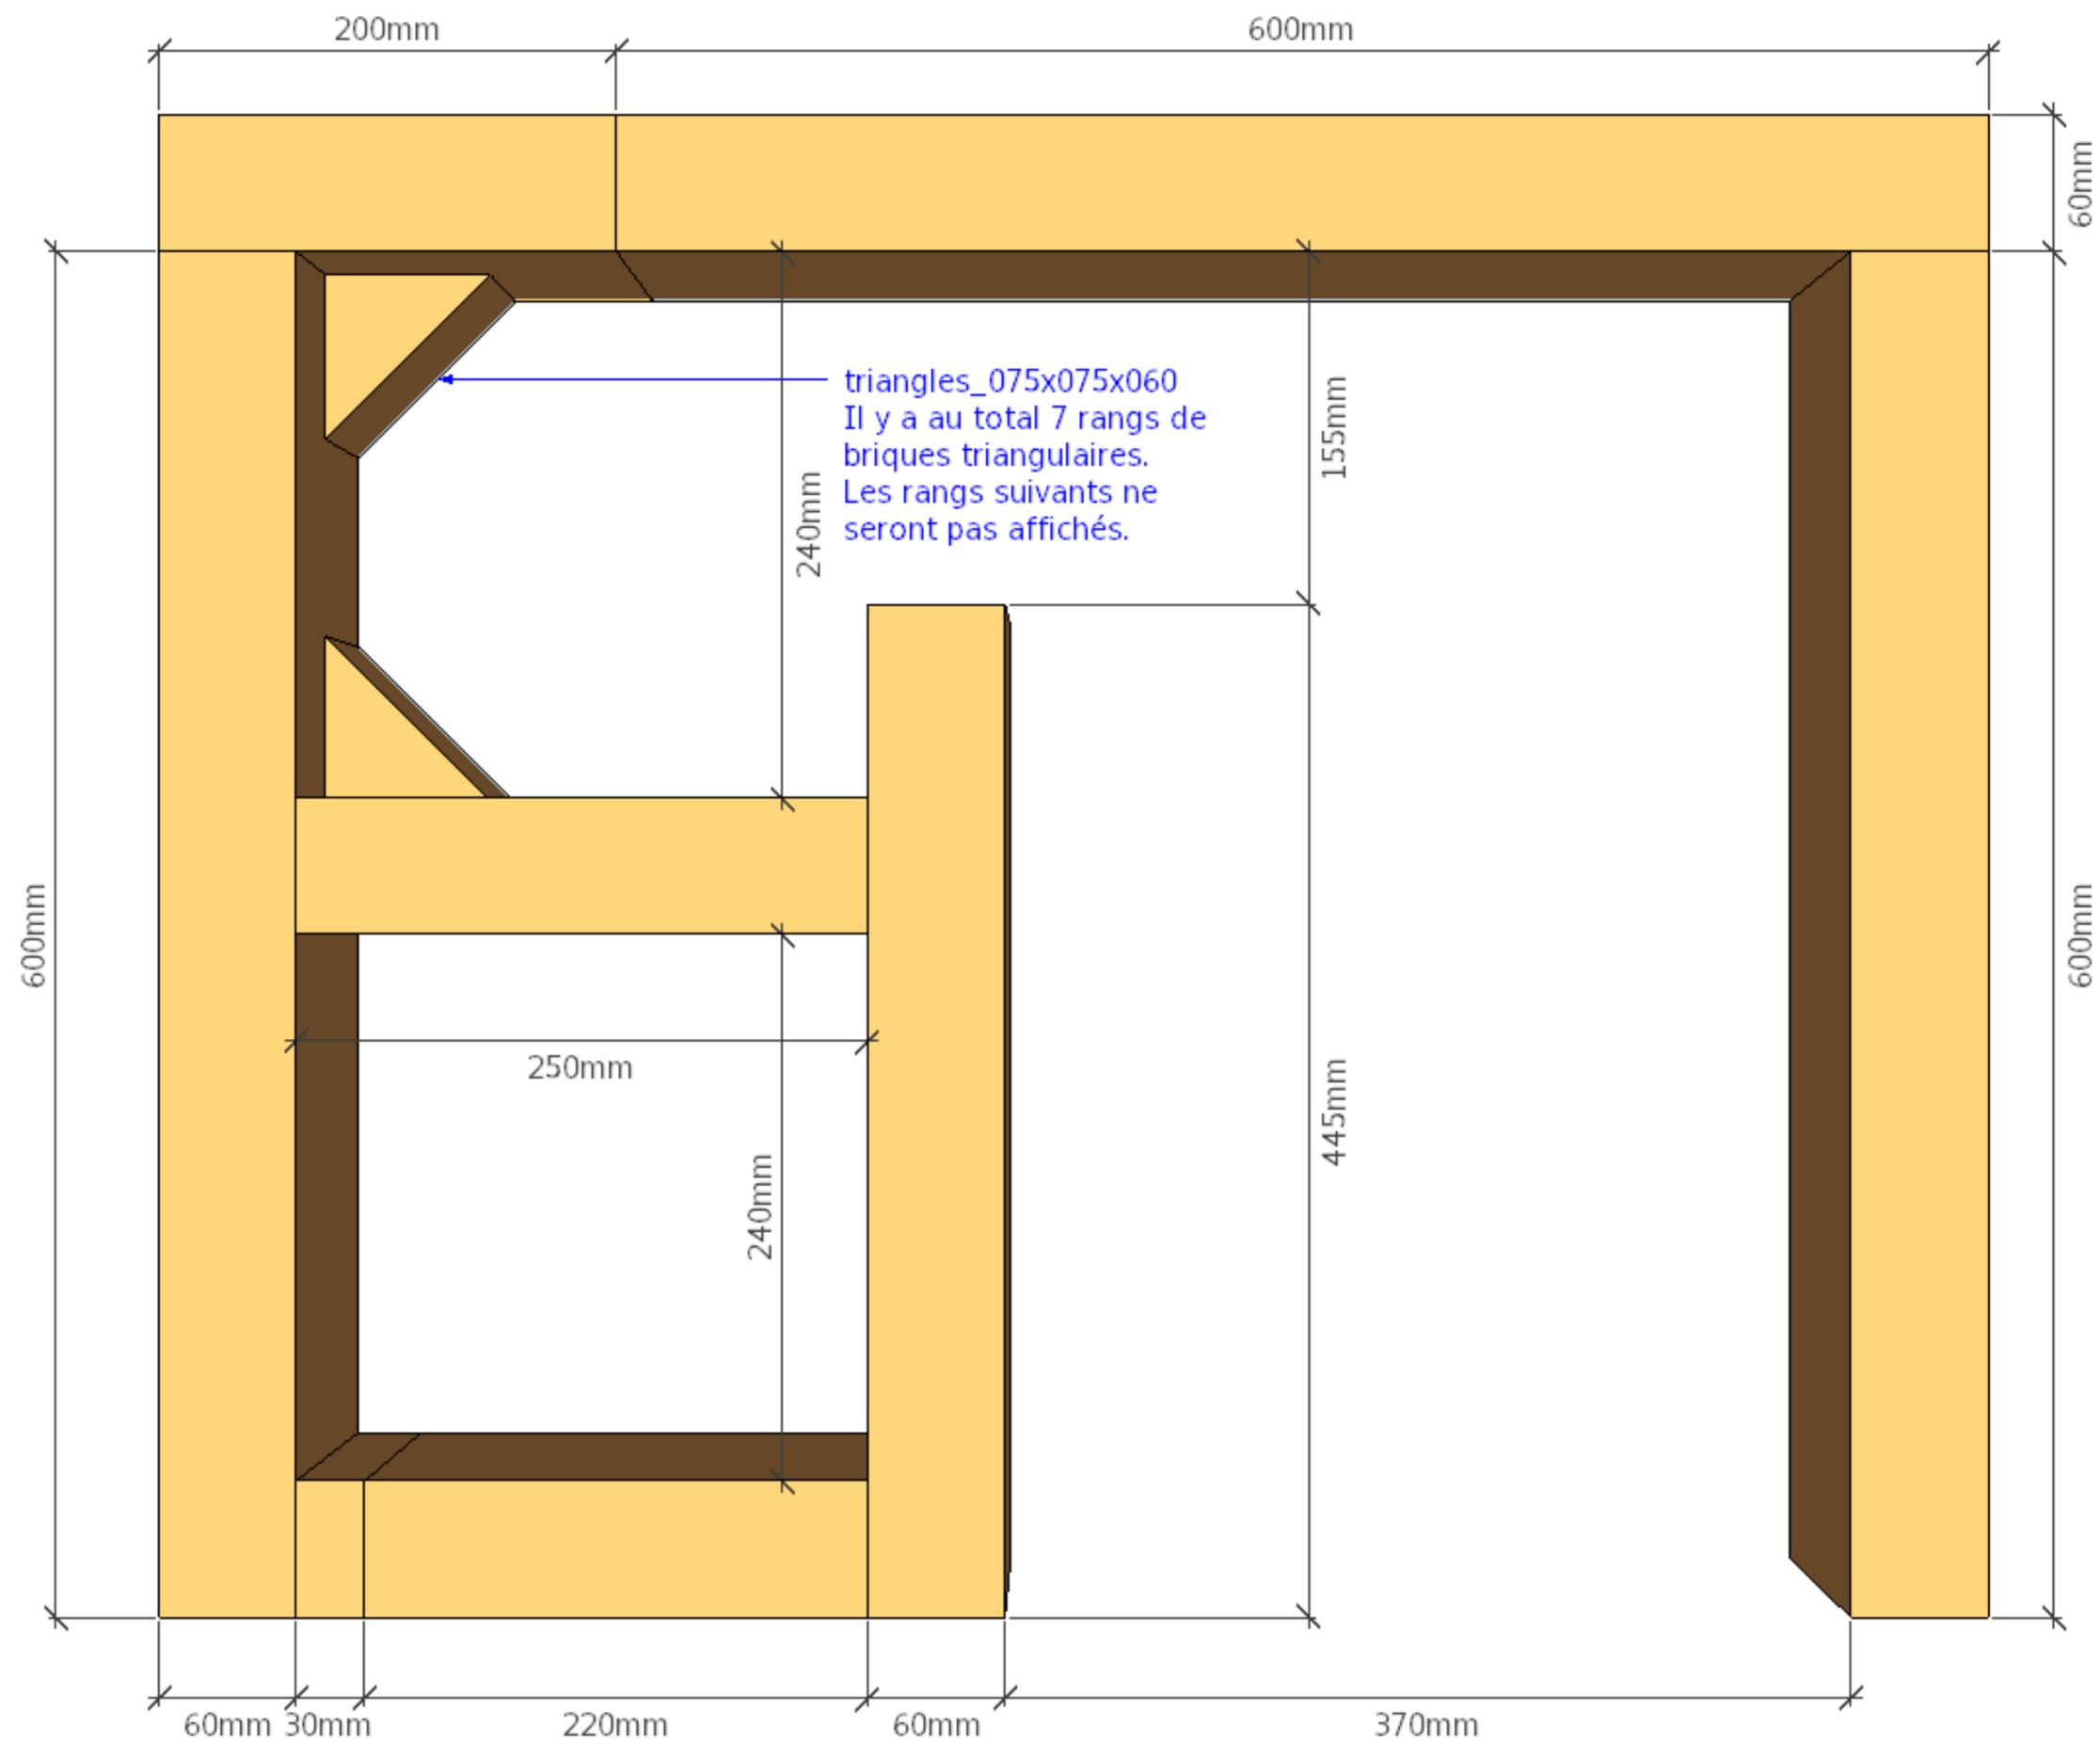

Les briques pleines de 220x110x60 mm ne sont pas annotées

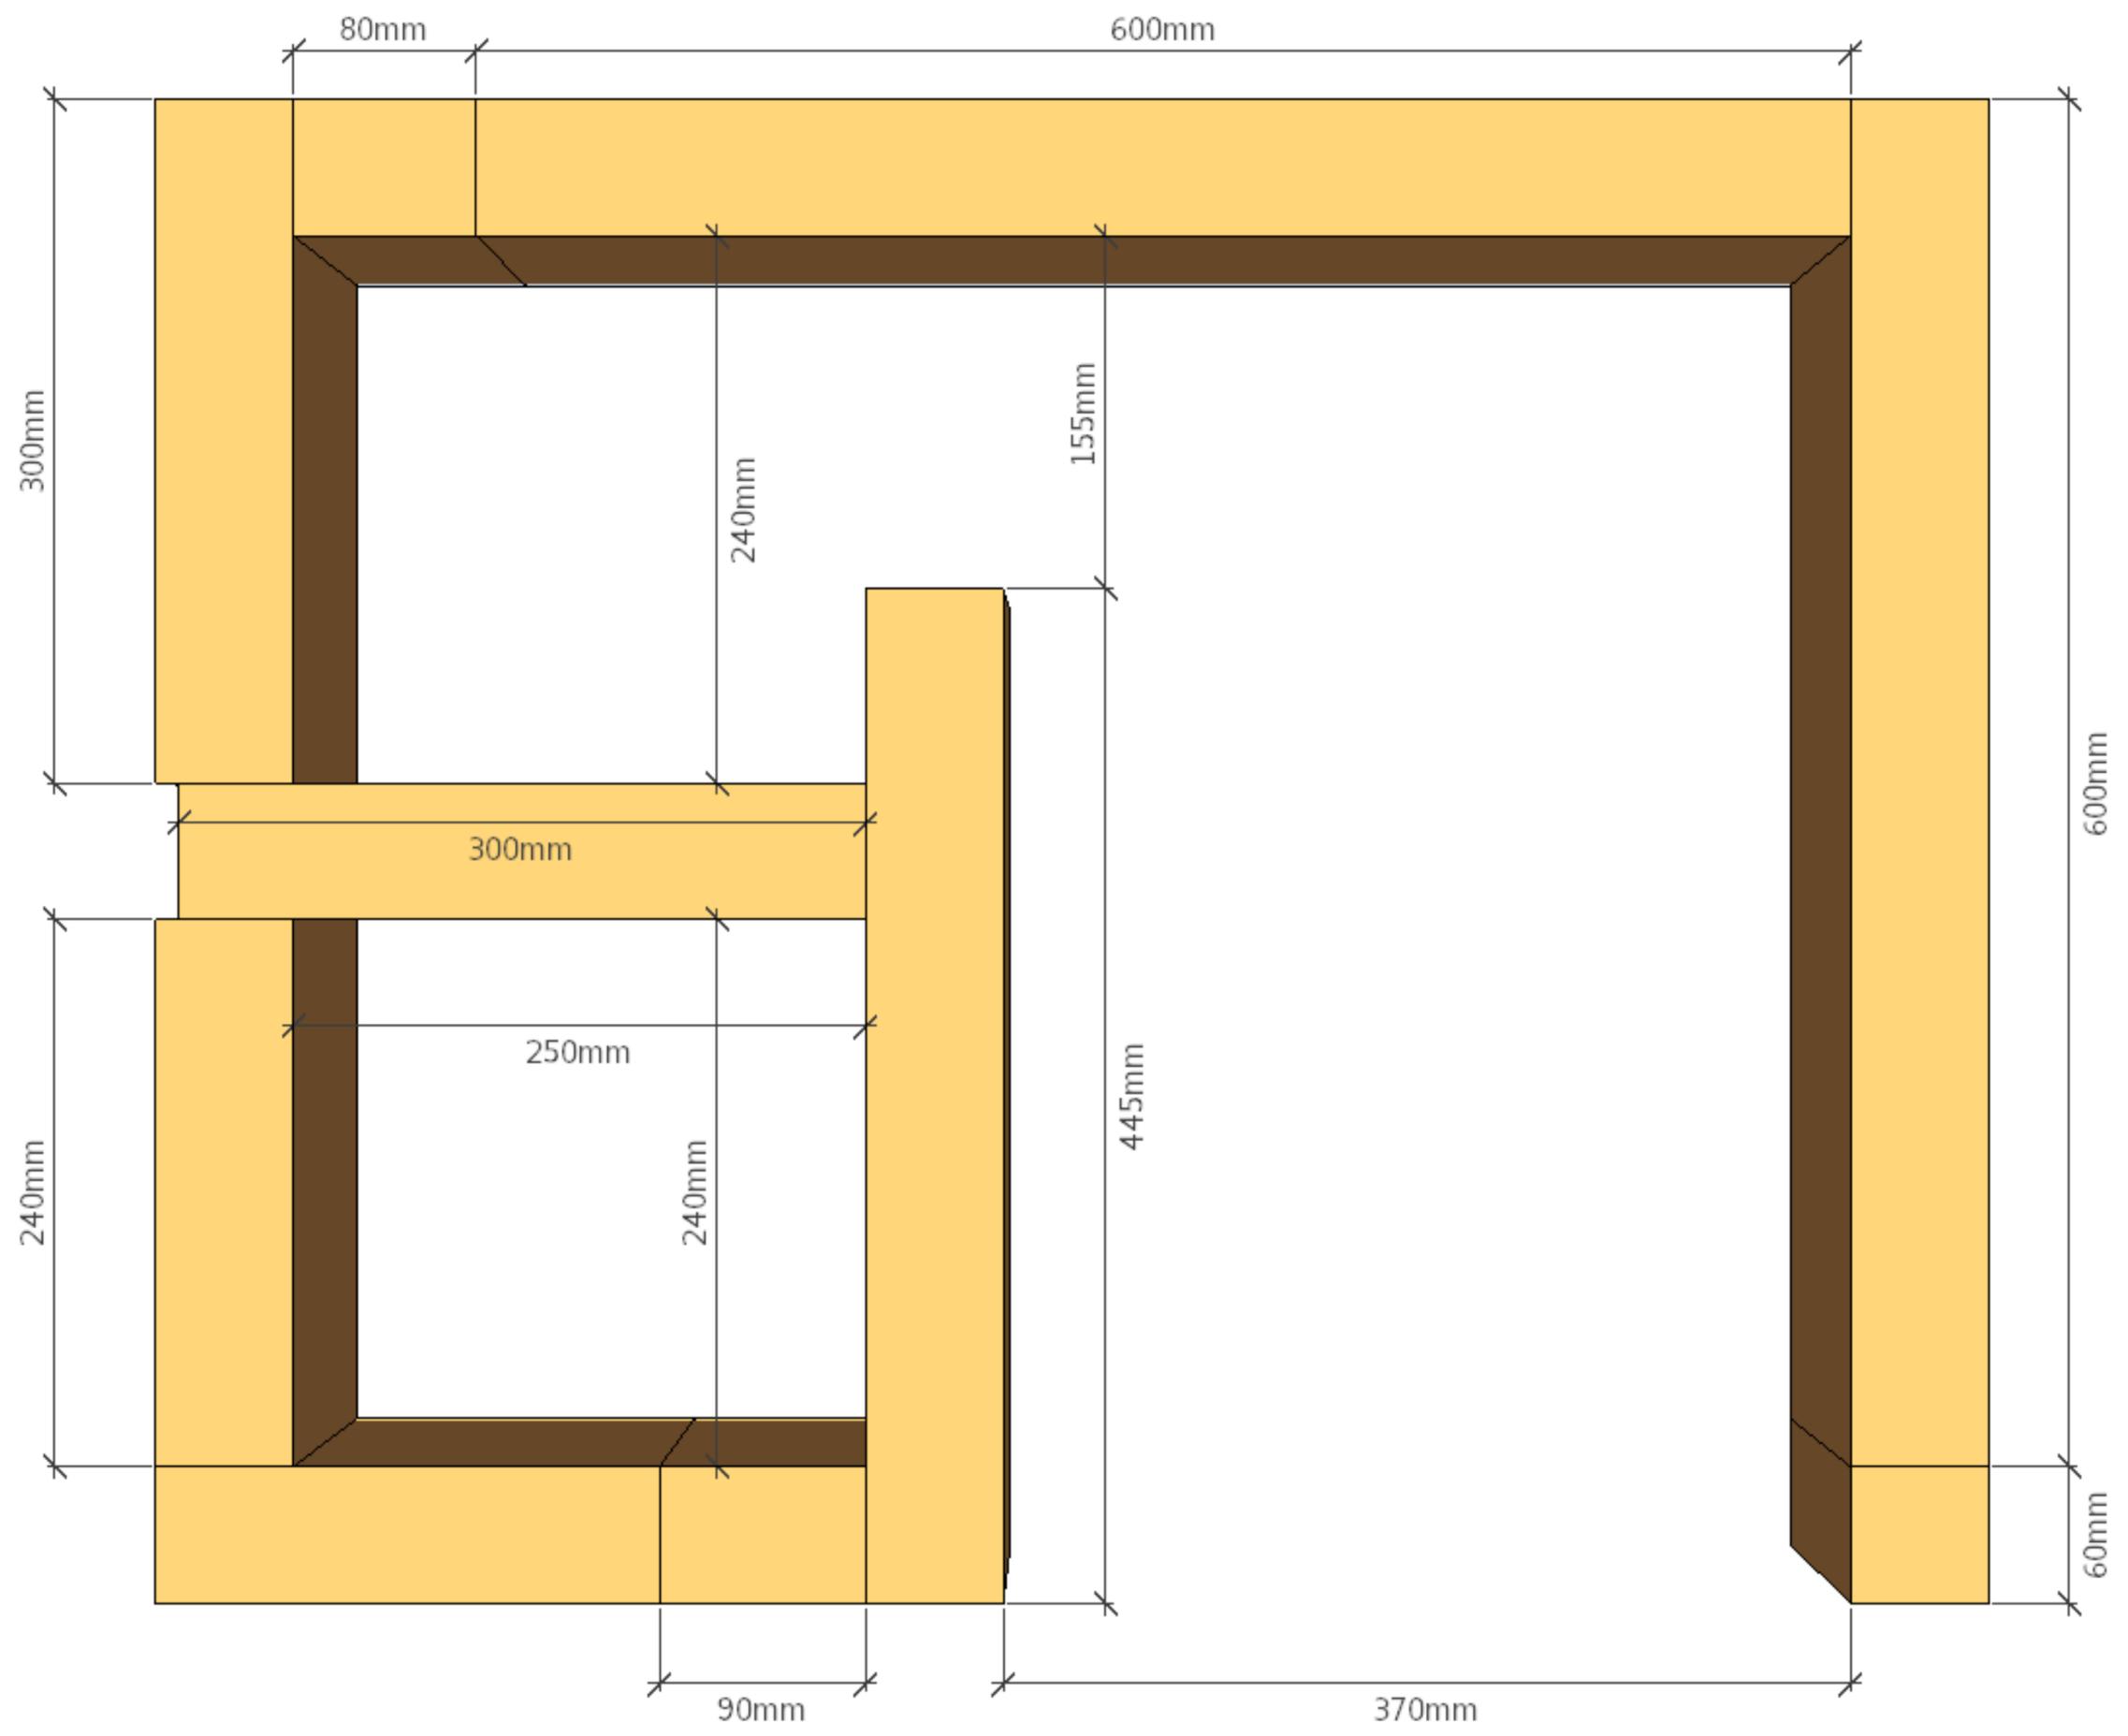

Sauf mention contraire, les côtes sont les côtes nominales (ie. sans l'épaisseur des joints)

Les côtes extérieures réelles sont d'environ 342x445 mm

ces faces sont maçonnées contre le poêle

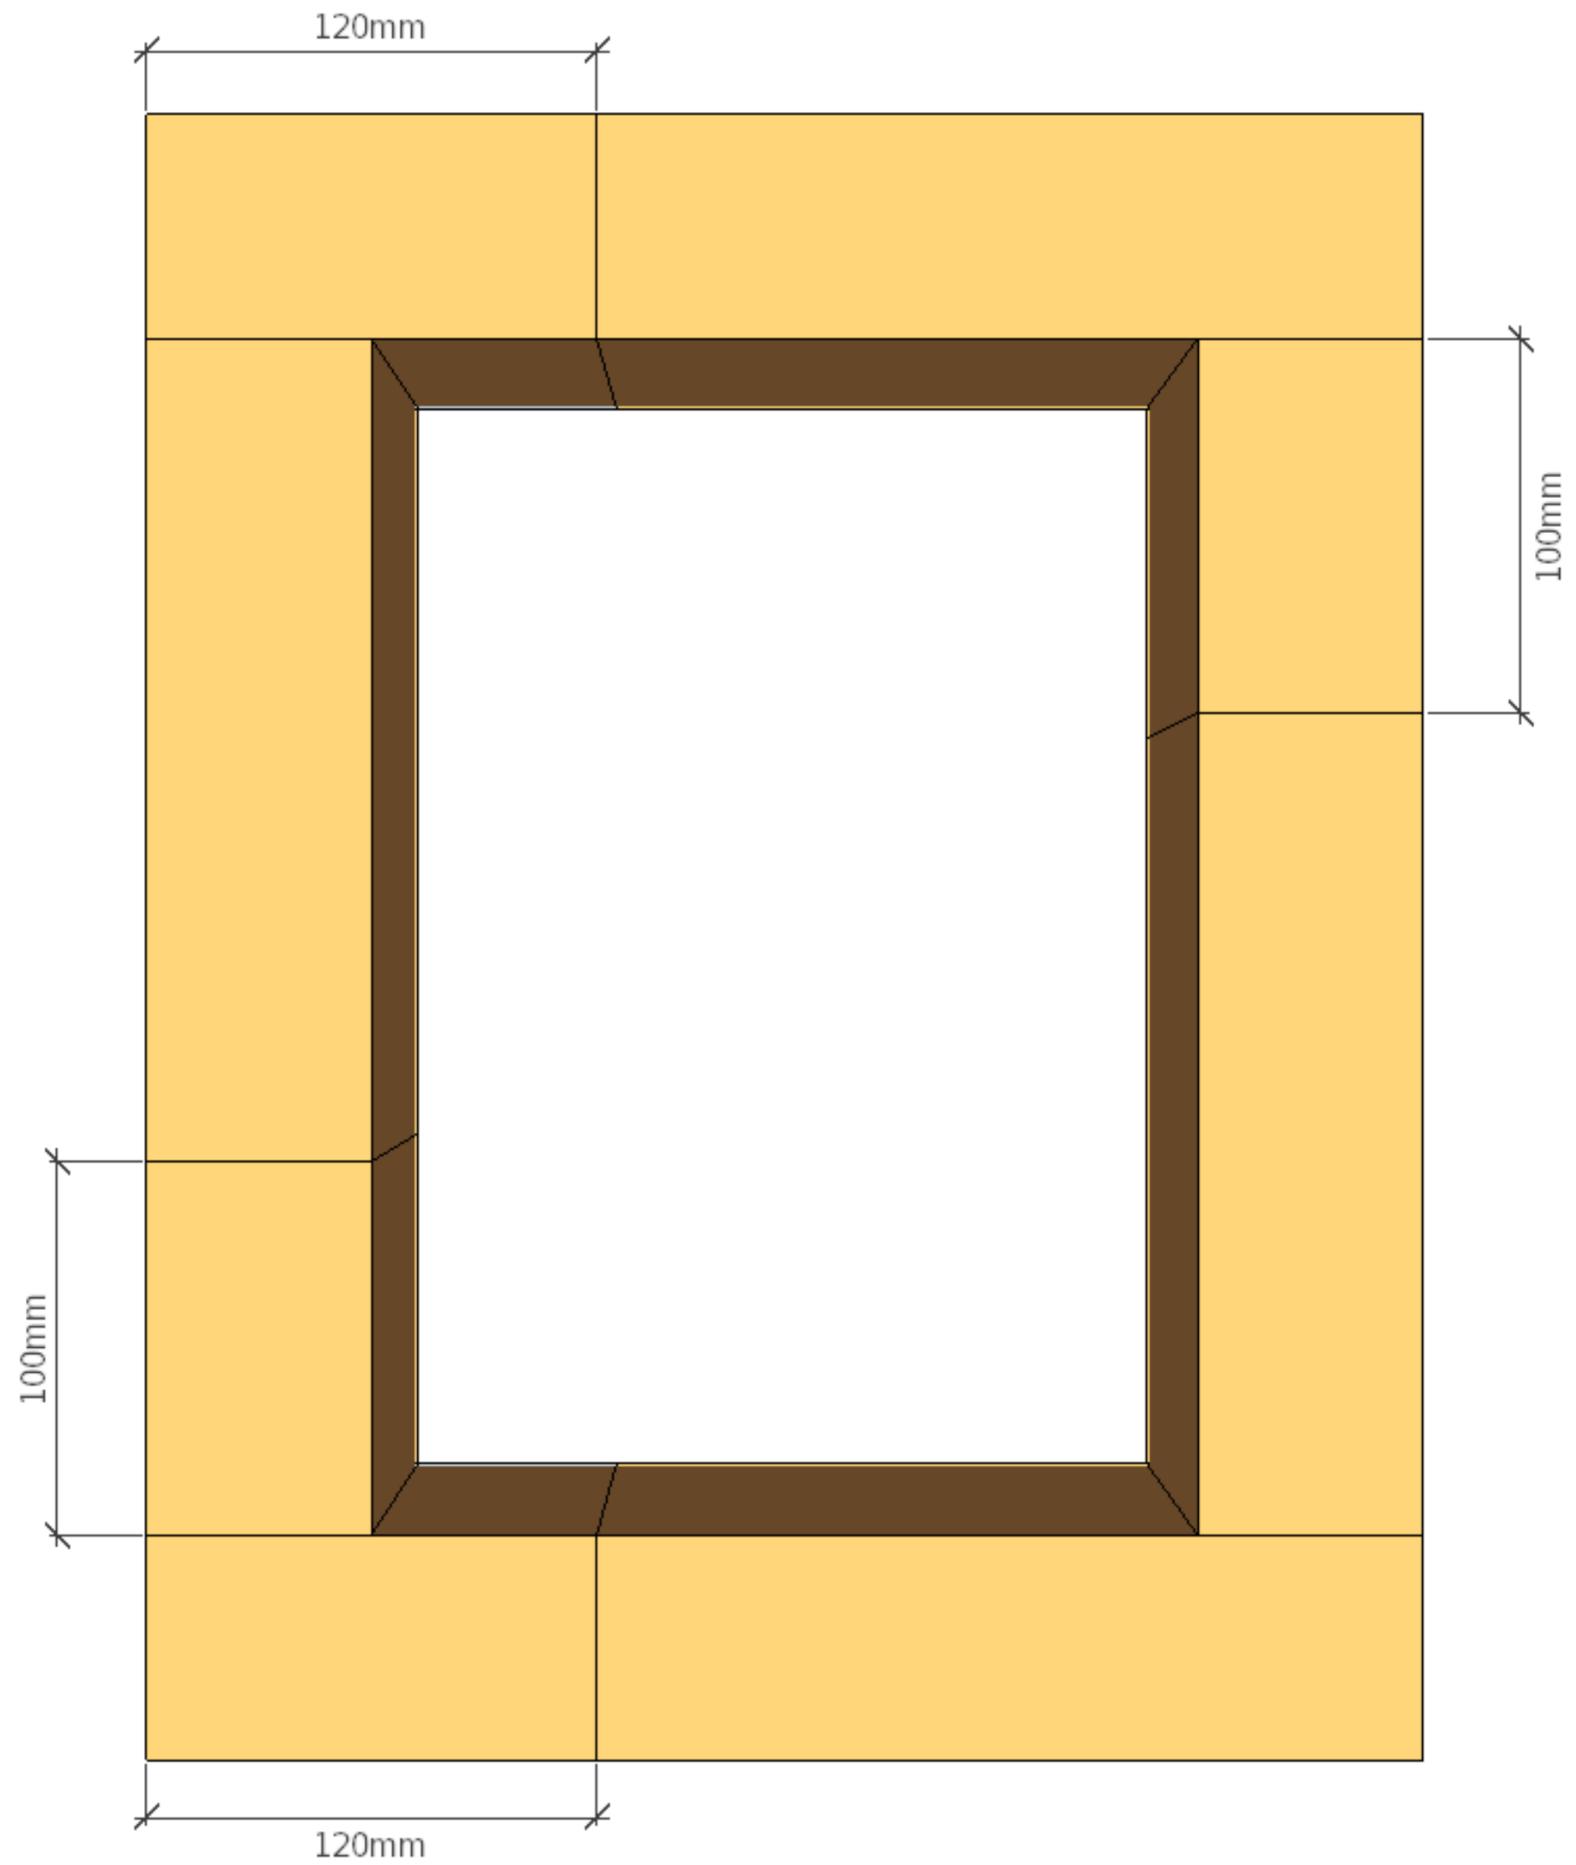

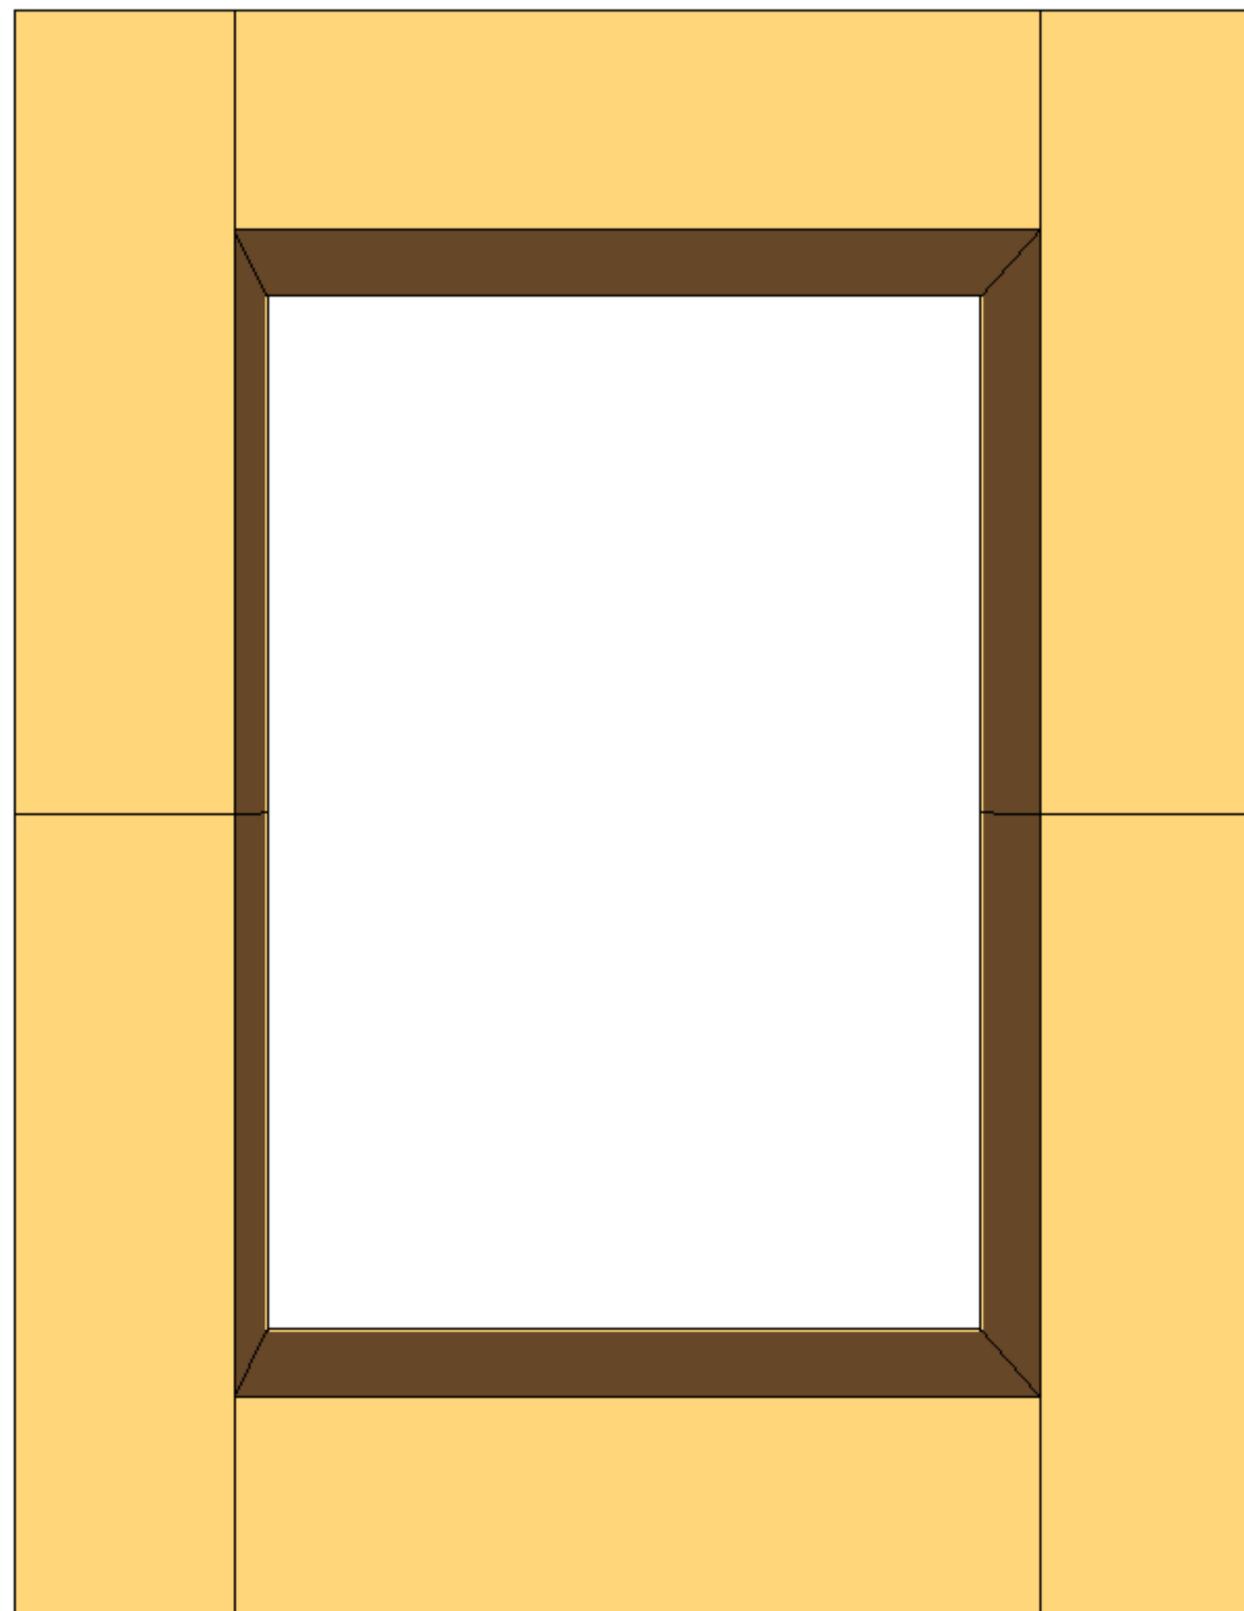

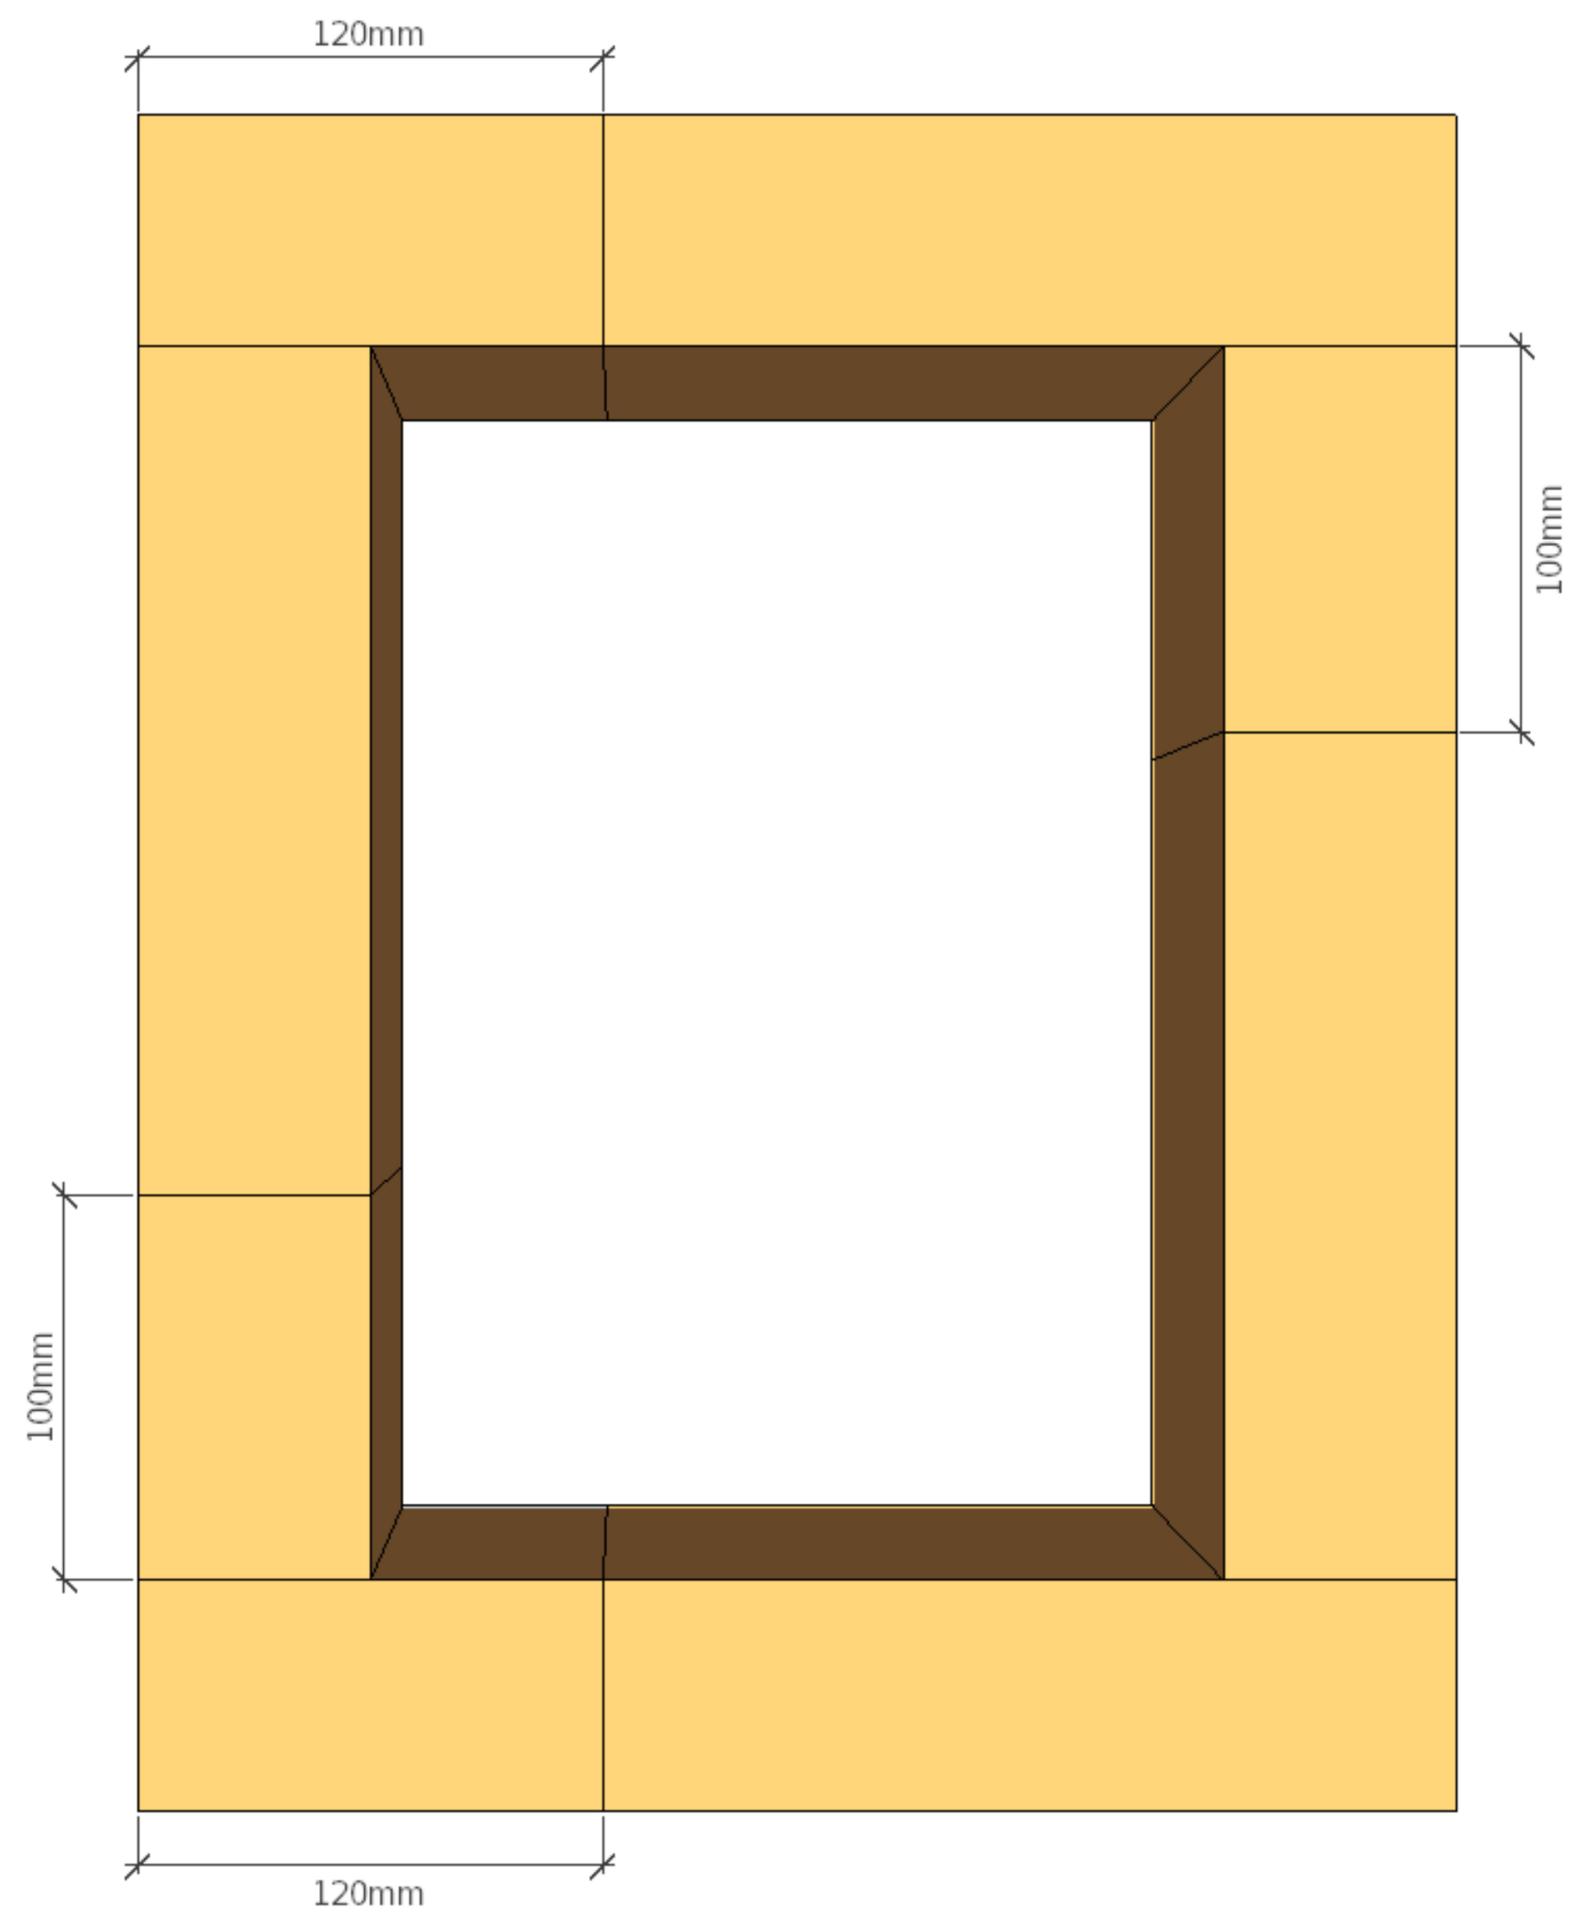

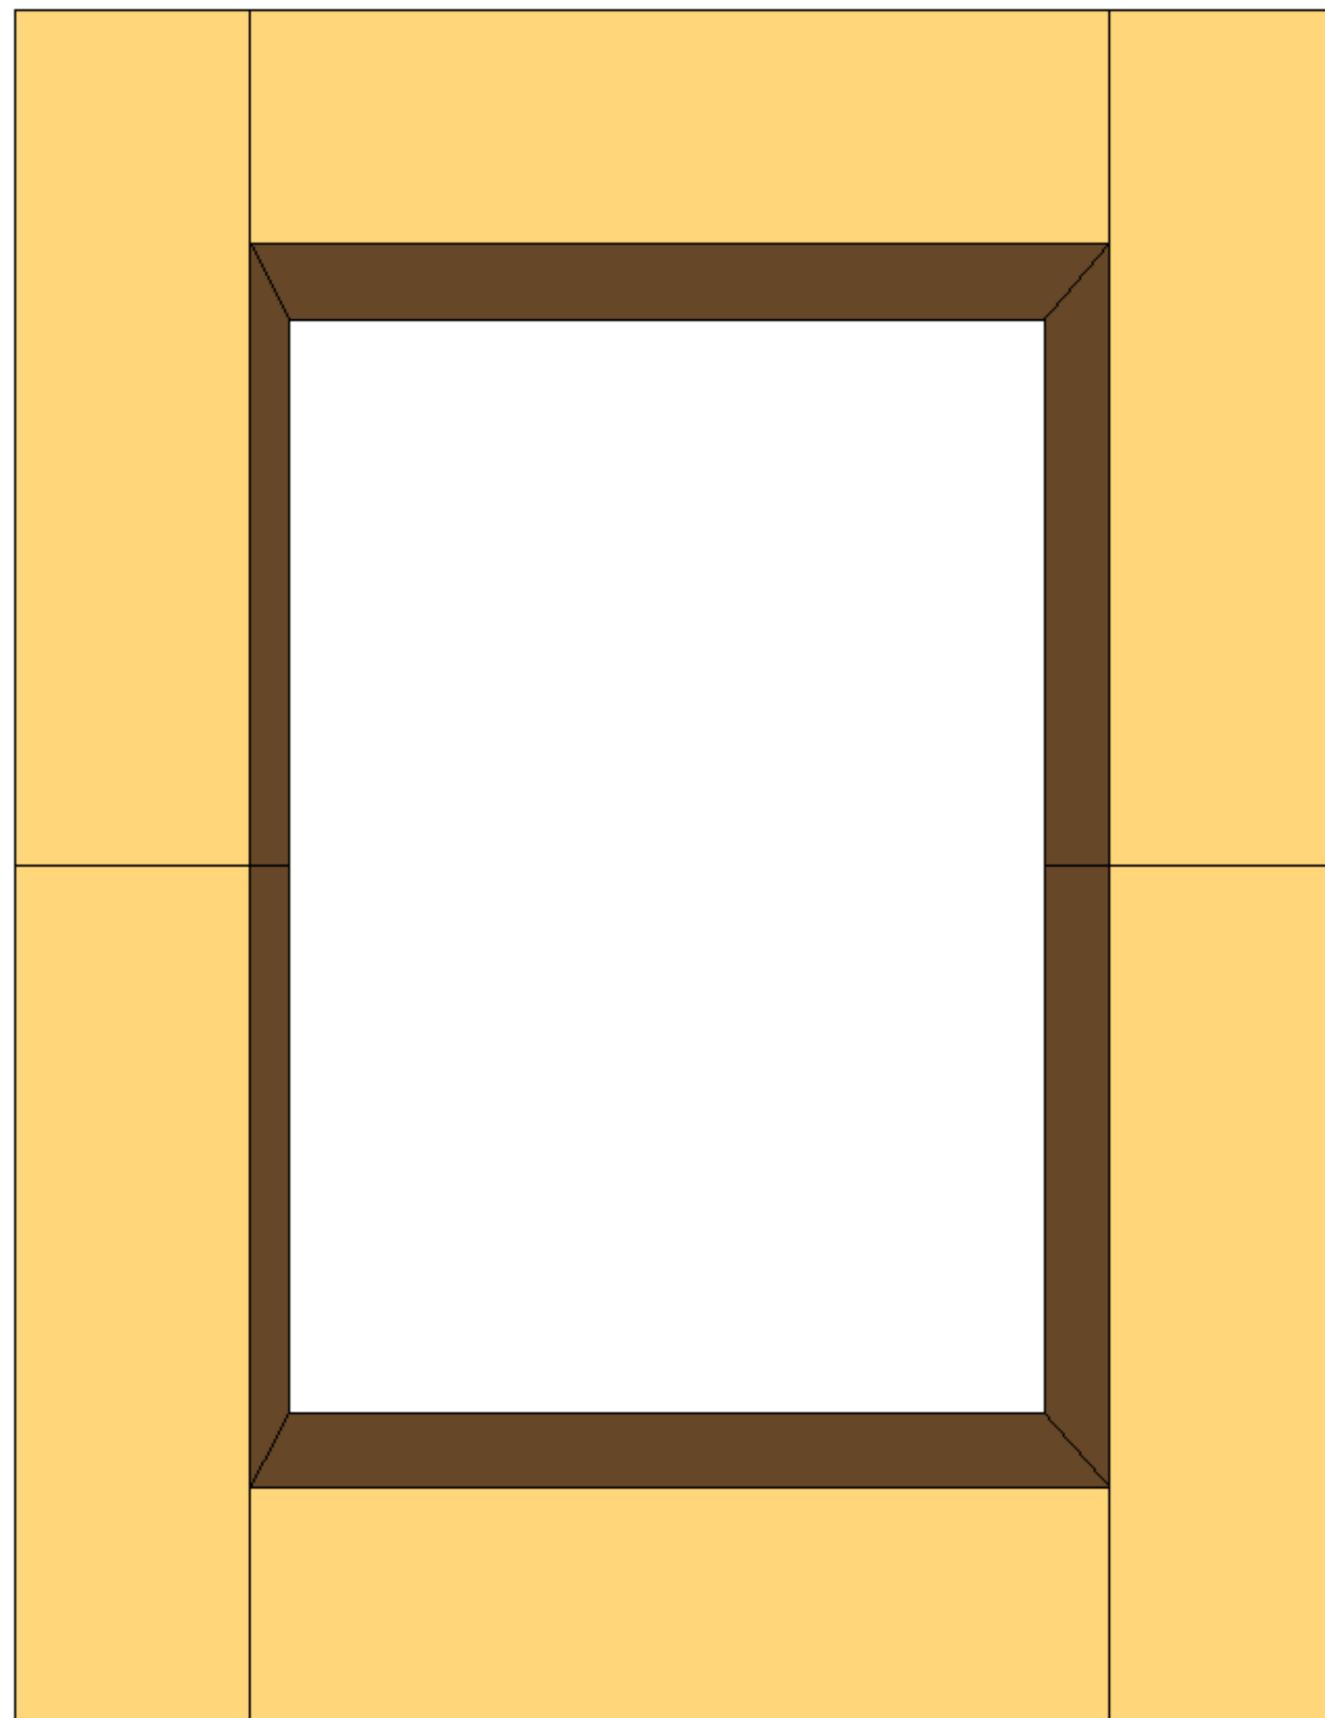

445mm

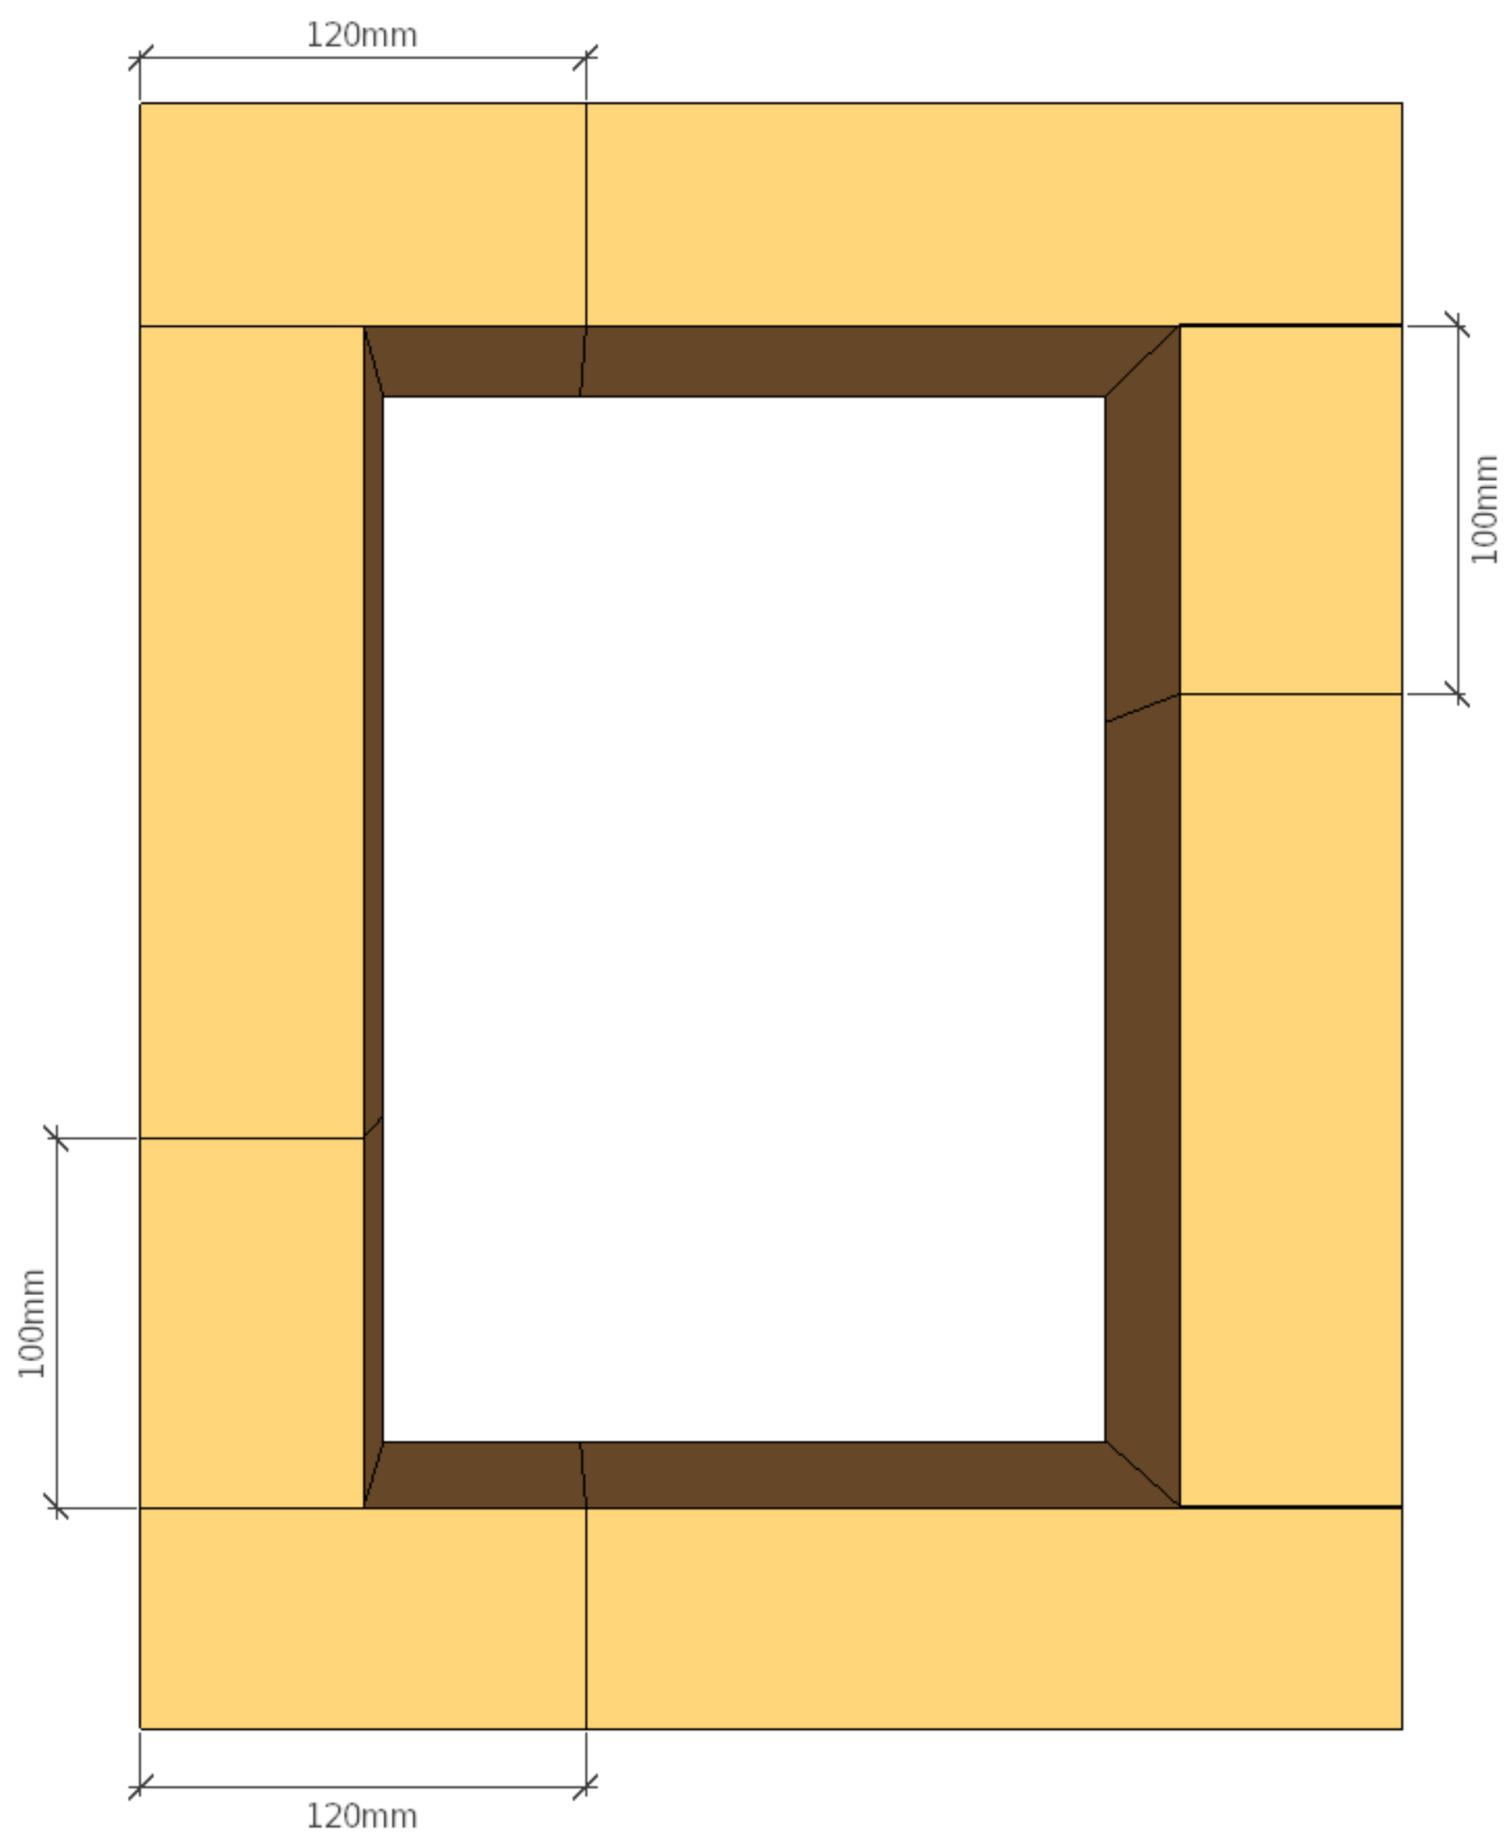

en coupant sur le trait,  
le linteau fait 443 mm environ

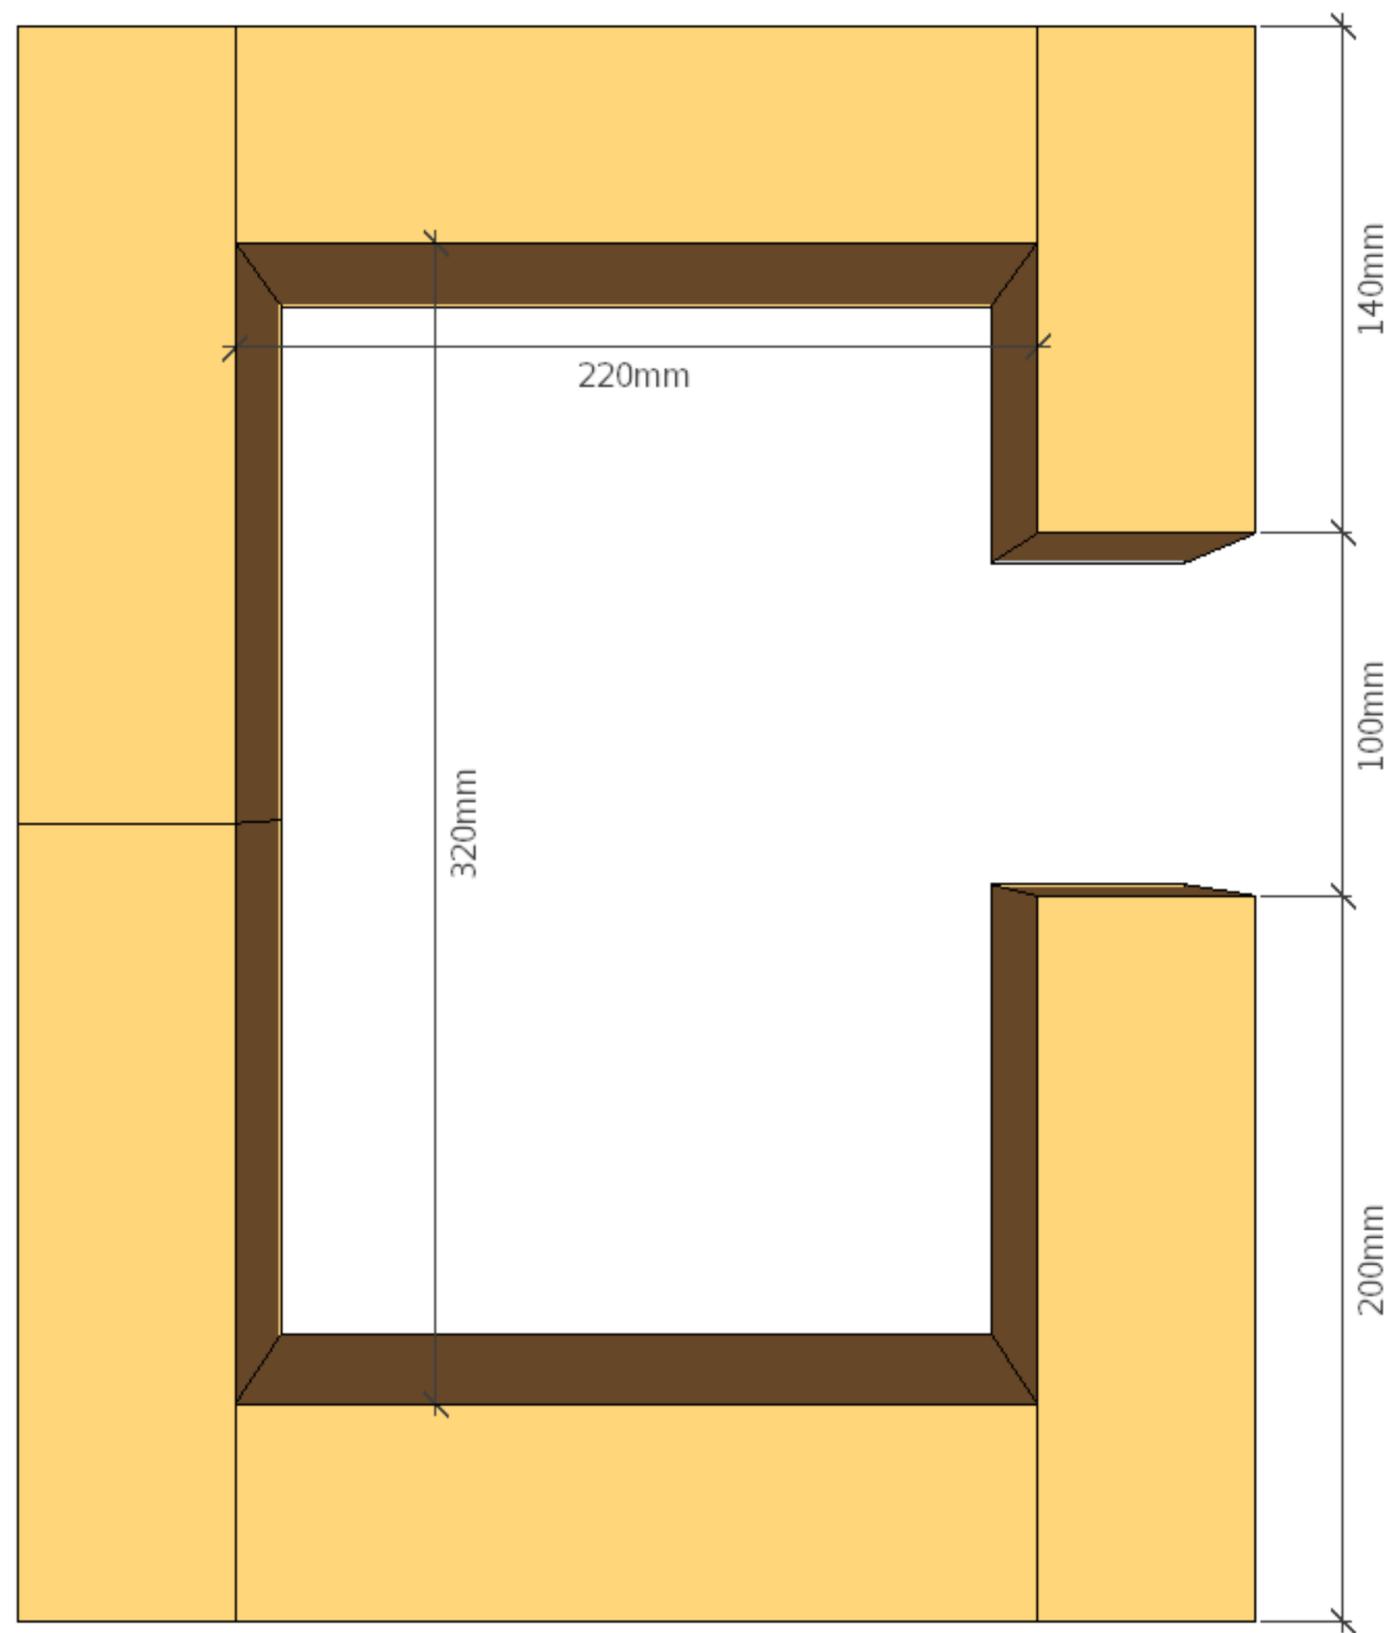

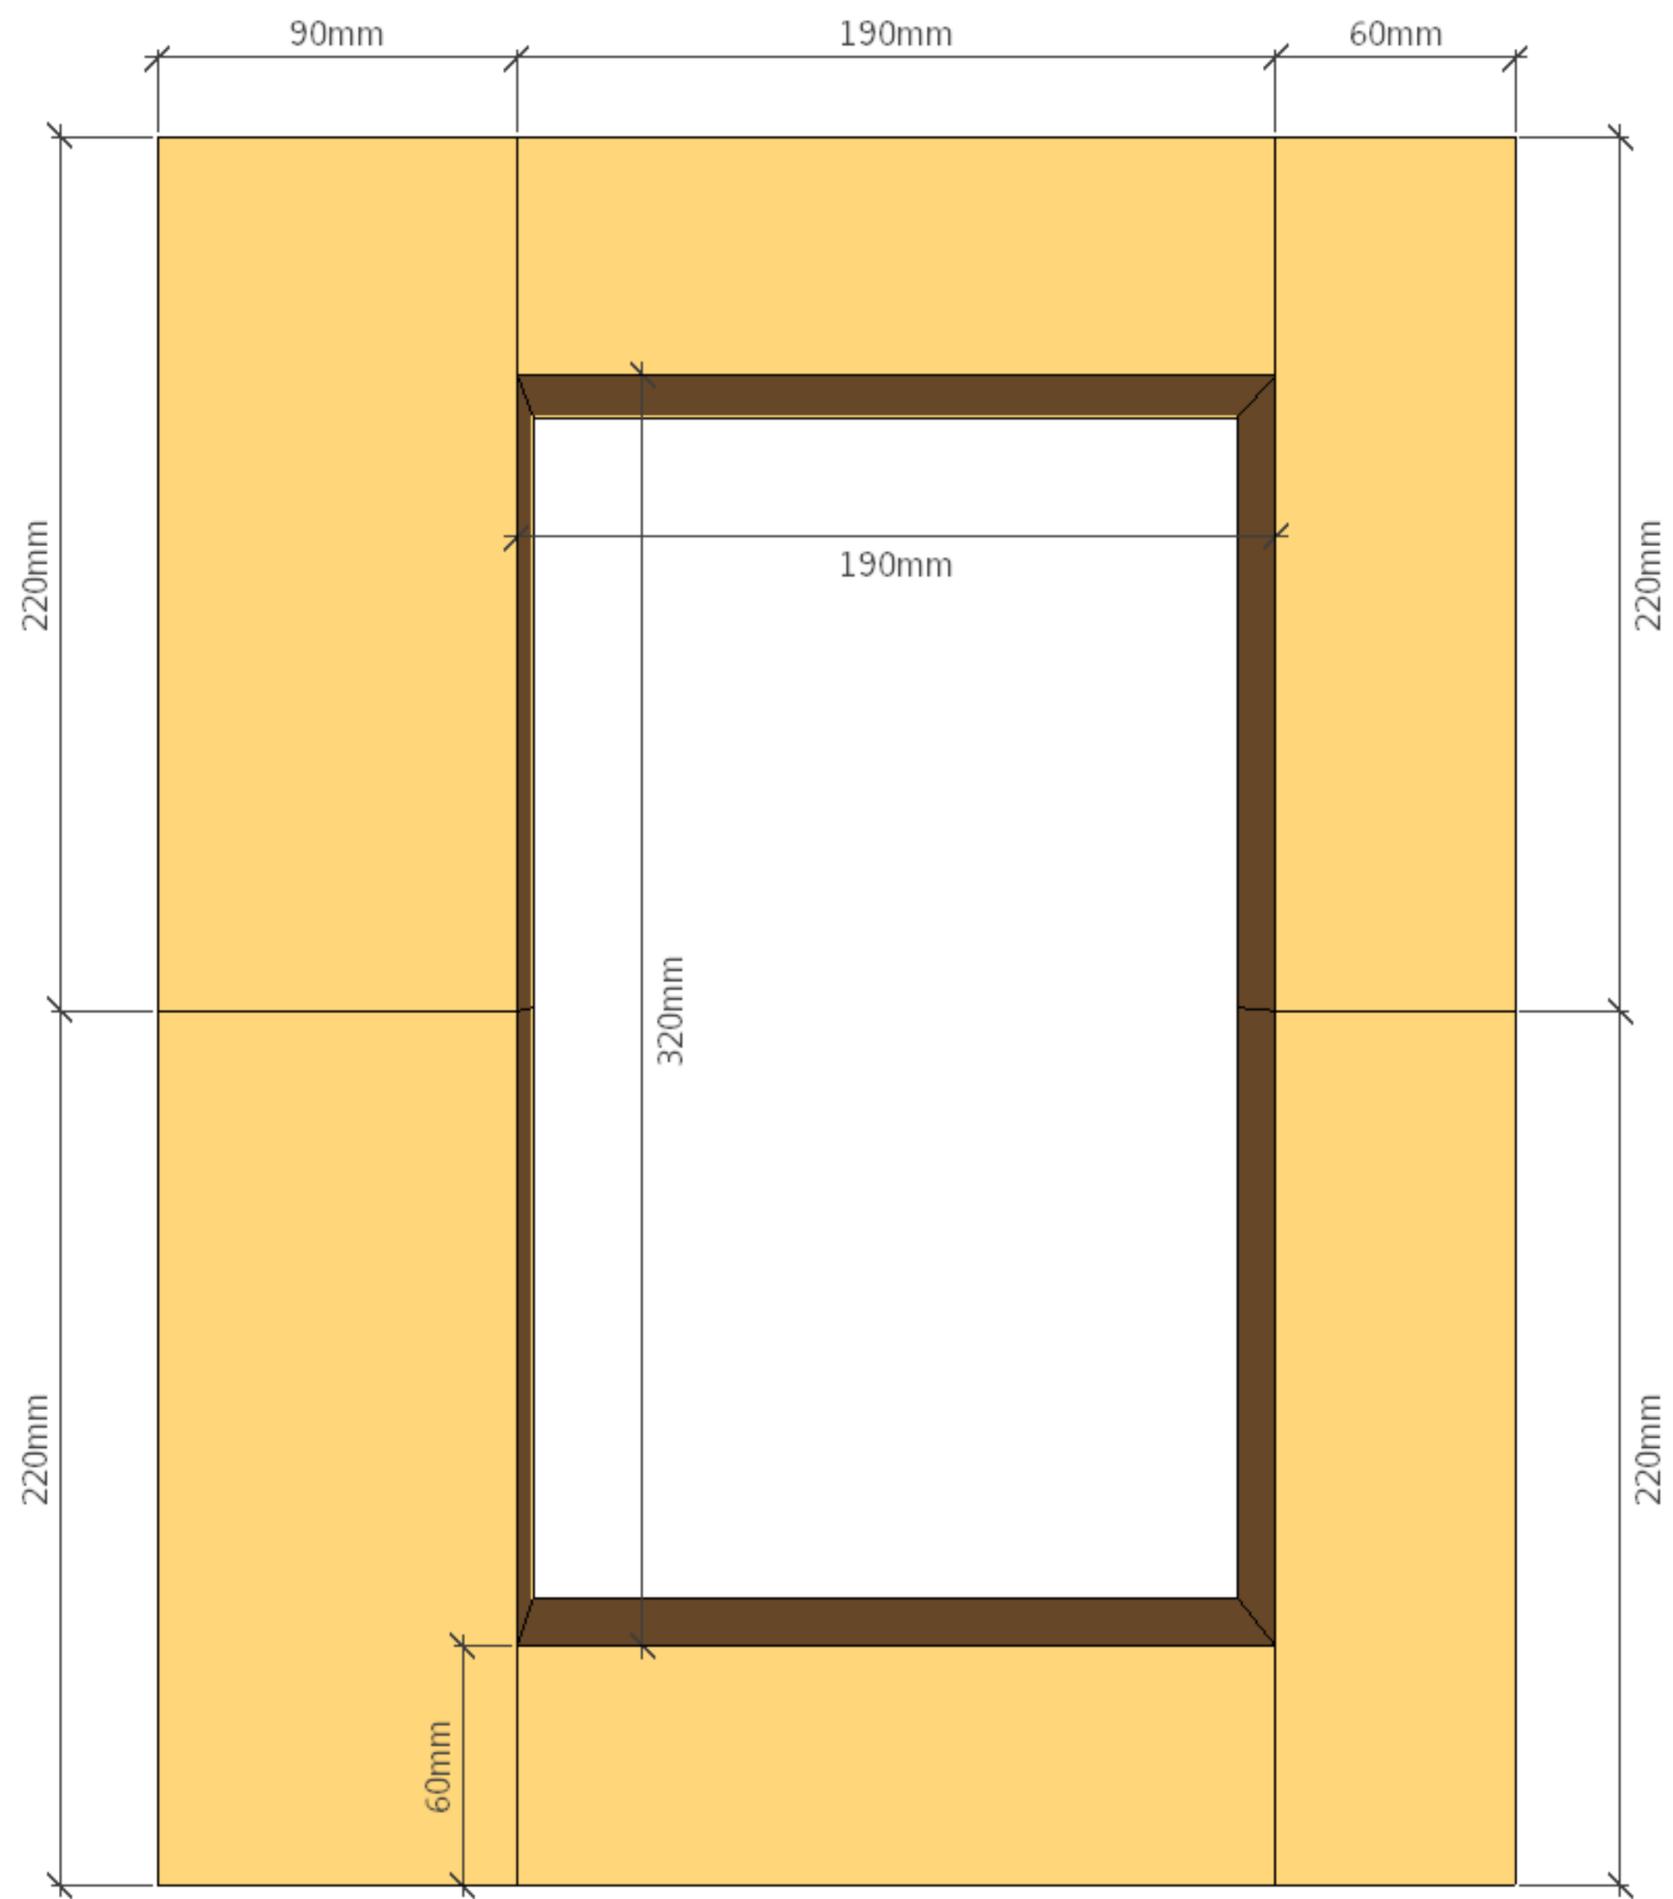

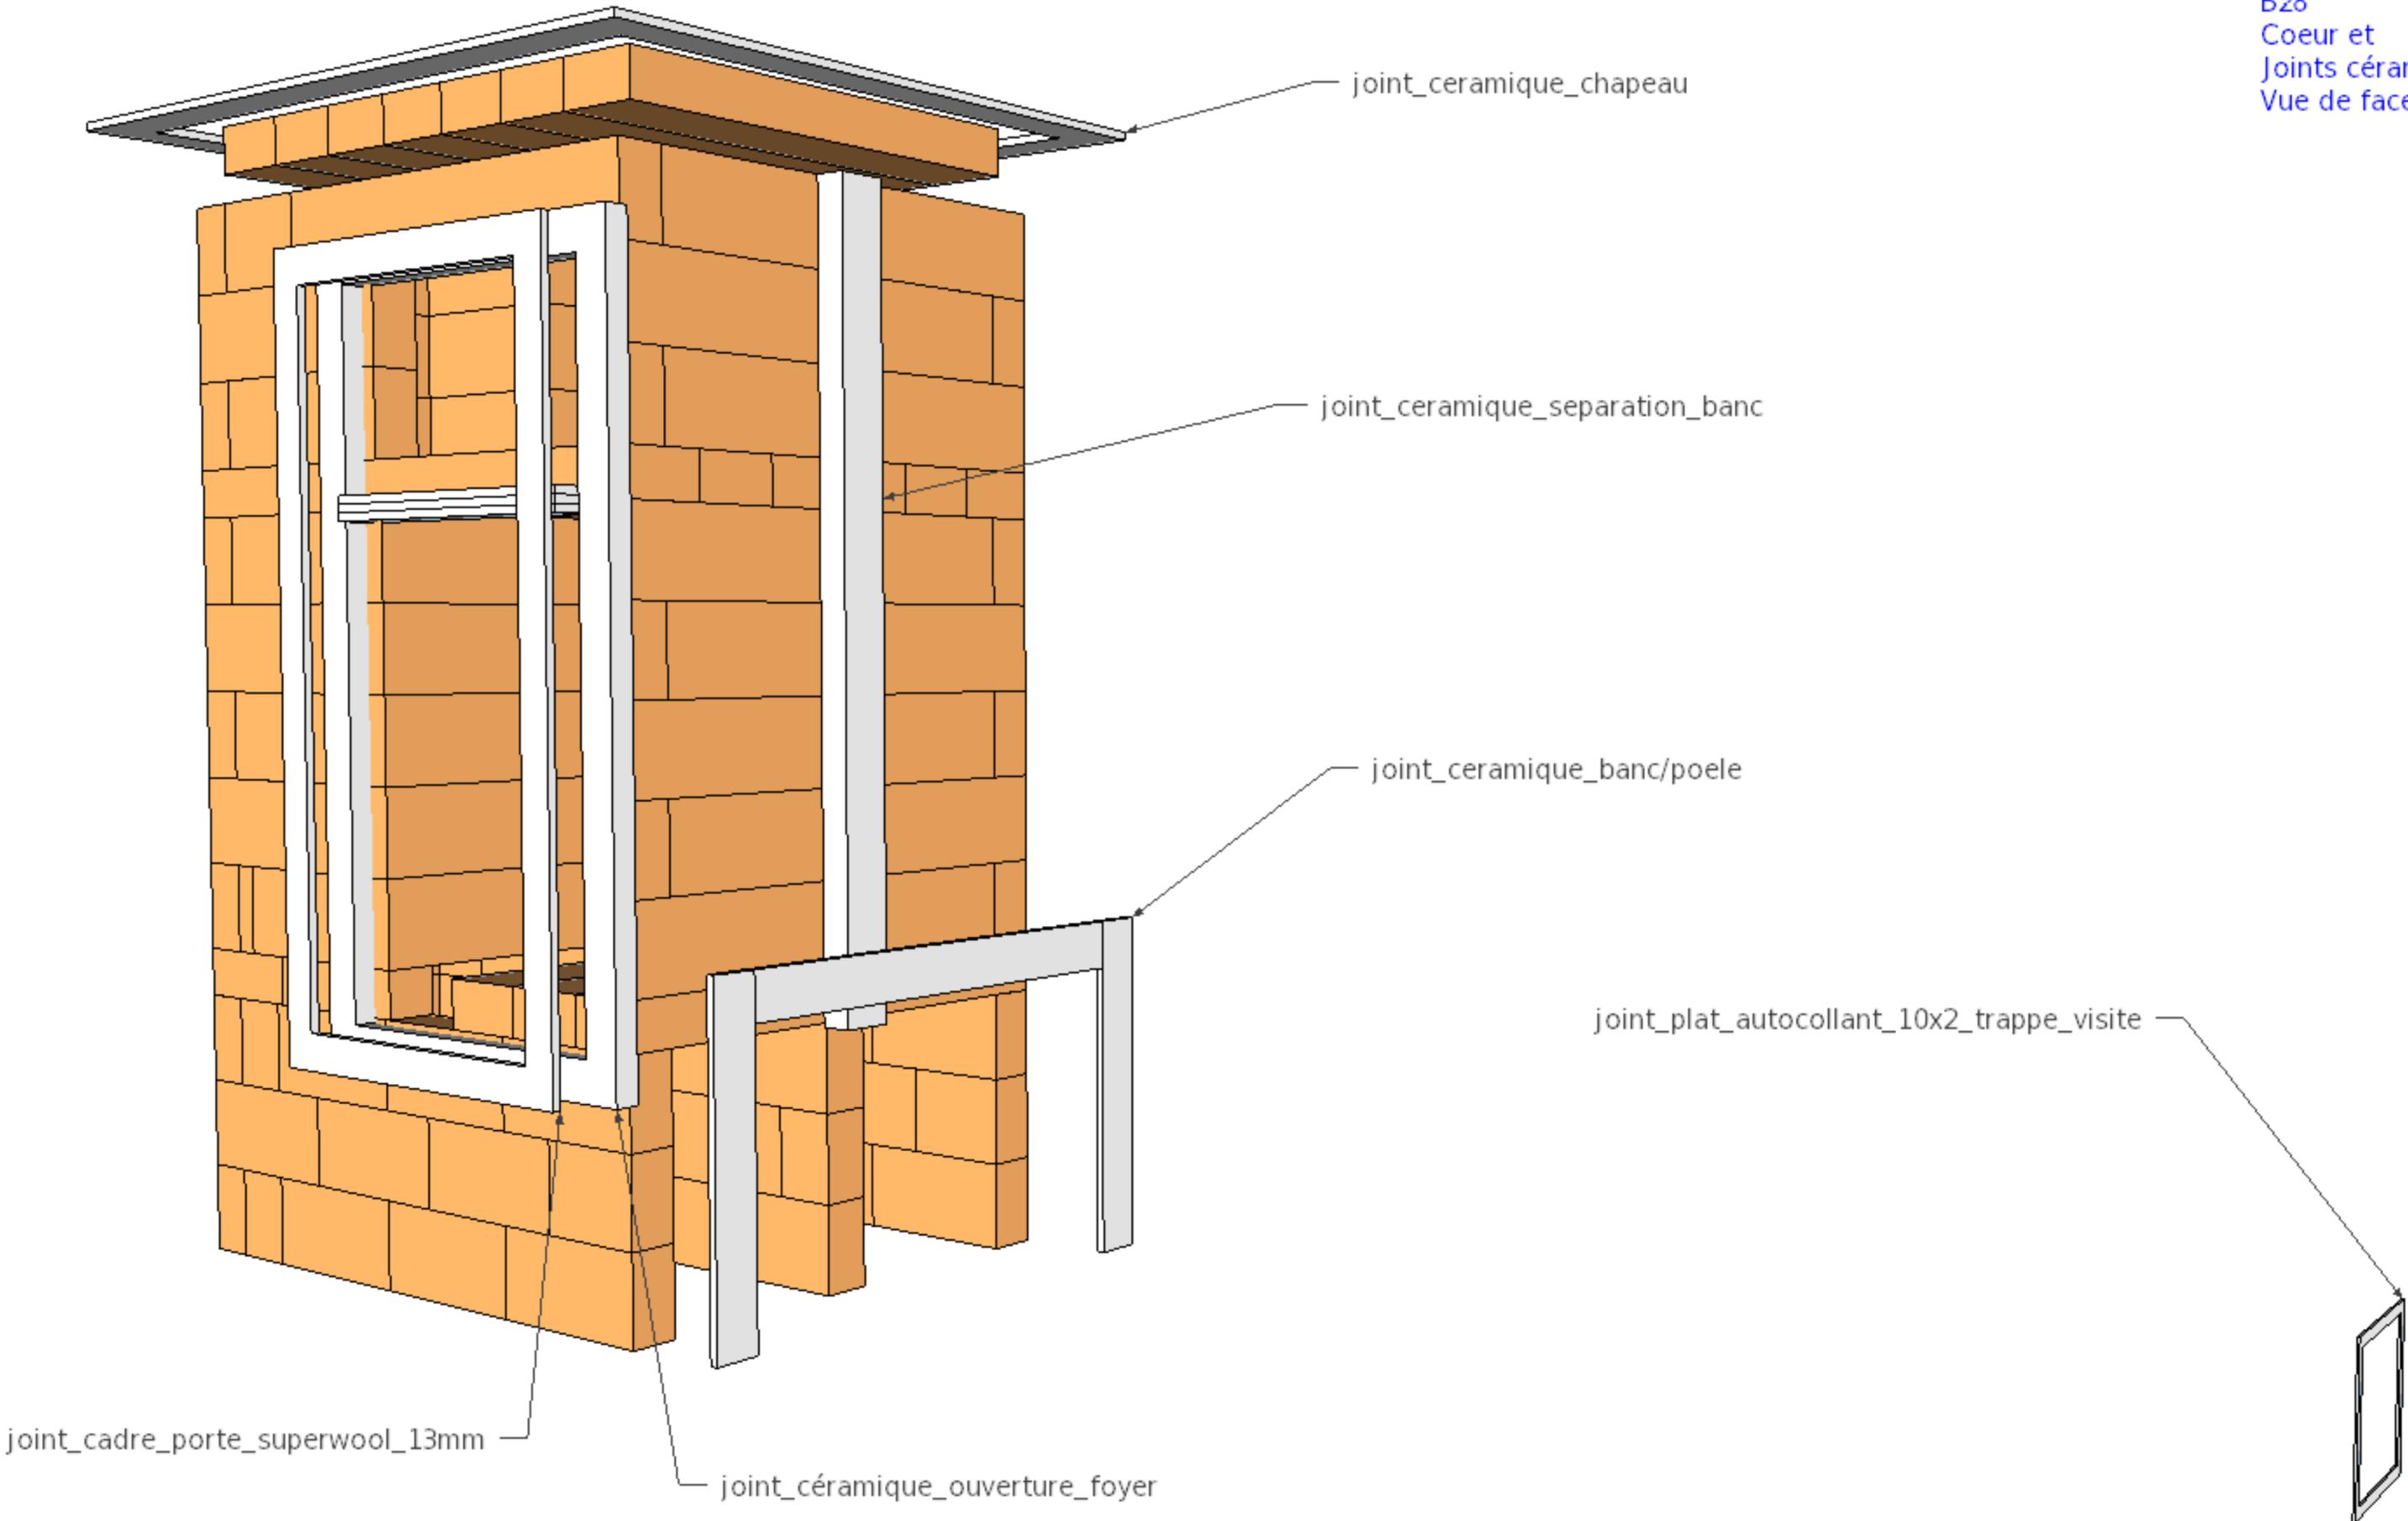

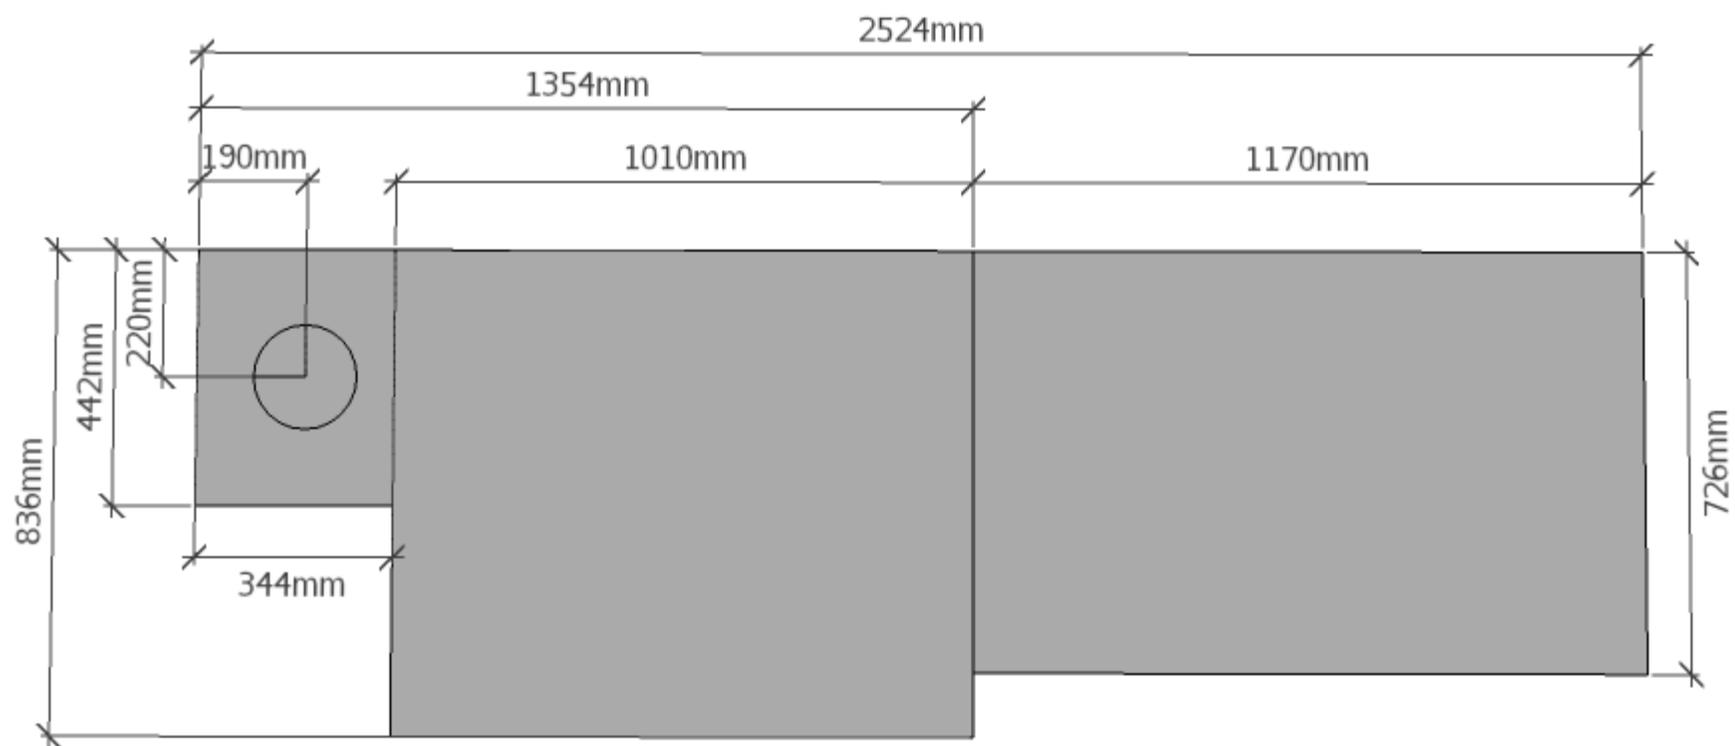

B28\_CG\_chanfrein  
position au sol

Les cotes indiquées ici sont les cotes réelles.  
Dans les autres plans, il s'agit des cotes nominales (i.e. sans les joints)
